# NECP development. Getting practical...

**Jim Scheer**

Head, Low Carbon Technologies

Sustainable Energy Authority of Ireland

23 March 2018

# Continuing the discussion from earlier...

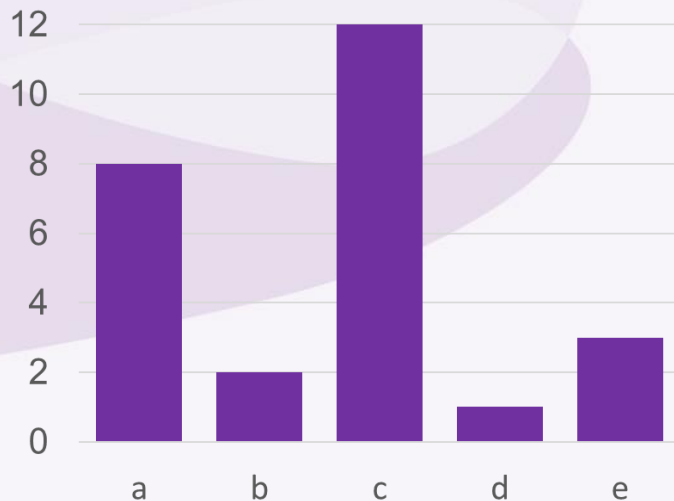

## Share your experience so far..

- Forming inter ministerial / agency groups at MS level
- Technical working group
- Online platform for information exchange
- POTEnCIA meeting and fora

# 1<sup>st</sup> draft National Energy and Climate Plan (NECP)

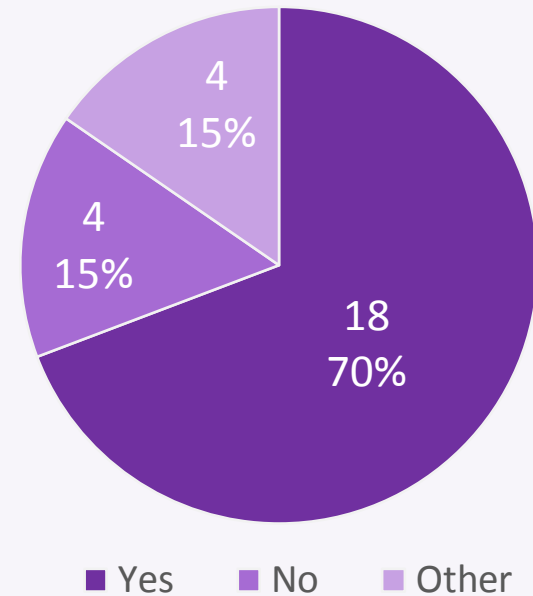

## Status of preparing the plan in 26 MS in March 2018

- a. Work is well on the way (31%)
- b. A concrete plan how to proceed ready but the work not yet started (8%)
- c. Planning how to provide the 1<sup>st</sup> NECP is started (46%)
- d. Preparation of the plan is not yet started (4%)
- e. Other (11%)

## Current understanding if the plan will be delivered by the end of 2018 (26 MS)

# More sharing of experiences..

DIRECTIVE

- Do you know who in your country is on the Technical Working Group?
- Has any MS in the room developed a bilateral relationship with another MS that is fruitful?
- Do MS have concerns around setting too ambitious a target?  
Context: EU assessment of MS commitments
- Is there a sense that after we have done the big work, ongoing processes will be streamlined?
- How might we continue to share experiences? What fora could we use, or develop?
- What in your view would make the NECP impactful?

# 'Burning' issues related to the preparation of the 1<sup>st</sup> NECPs and its linkages to EE and EED – collected from 26 MS in March 2018

5(6)

- Long-term planning and modelling
  - **Are you incorporating ex-post evaluations in your modelling?**
  - Experiences of exercises on Member States – can MS results of modelling be compared?
  - How to ensure the impacts of the existing and proposed future policies and measures included in the modelling and trajectories being developed for the NECP?
  - Are there some common ways to create indicators that lead to reliable and realistic projections to 2030?
  - With Additional Measures modeling: political decision about target setting – choice of measures and ex-ante evaluation of their impact?
  - What are the approaches MS are using to define baselines in the scenarios? What should be reported about baselines?
  - New policies and measures for 2030?
  - How to define impacts of different measures required in analytical part of NECP?

# Thank you for your attention
