

Article 4 renovation strategy Romania

Description of the programme/ measure

On the basis of the renovation strategy, a new funding programme for the thermal renovation of residential buildings has been introduced

- Total sum allocated 2014-2020: €850M
- Objectives:
 - Reduction in emissions: 580,000 tonne CO₂
 - Social effect: 408,000 dwellings with c 1M inhabitants (> 5 % of total population)
 - Contribution of dwellings owners will be only of 25 % from total value of the projects
 - Energy Security: decreasing consumption of gas for heating

Critical success factors

Critical to the success of the strategy was an engagement process with stakeholders and the buy-in of the government

Innovation

The Romanian strategy was the only one putting a value on the wider co-benefits of energy efficiency

Final comments

- Romania Green Building Council has initiated a stakeholder process, under the BUILDUPON banner, to inform the next version of the renovation strategy, due in 2017
