6th Plenary Meeting

Energy Efficiency First

Guidance documents and practical application

Stefan Katzmann

Domain Coordinator

E-Control

28.03.2028

Results of Mentimeter Questions

- MS are progressing on the implementation of Article 3 and a few are already advanced.
- Most MS have not yet assigned a competent authority to monitor the application of Article 3 but have started his process.
- There are different views on who this authority will be (1/3 would mandate the ministry, NRA or energy agency).
- Most MS have not yet applied the EEFP, but when it has been applied, it has been for energy, industry or buildings.
- MS still do not know exactly how to implement (vague and unclear) and monitor Article 3.

Overview of the Sessions

- The draft Recommendation on the design of CBAs for EEFP Requirement of Article 3(6) of EED recast was shared with MS and presented by the Commission (expected adoption Q2/2025).
- The Sector-specific guidelines for the application of EEFP was also presented but with less details (expected adoption Autumn 2025).
- The SEED MICAT project was presented as a practical example of the EEFP. This tool offers a comprehensive approach to estimate Multiple Impacts of Energy Efficiency by providing a publicly available and easily usable online tool.

Future of Domain 3

- Combined working group on energy efficiency performance and waste heat utilization in data centres (Article 26 and 12)
- If you want to join this working group, please contact domain coordinators Stane (stane.merse@ijs.si) or Stefan (stefan.katzmann@e-control.at).
