Domestic and social dimension

ASSERT PROJECT

Large-scale multiactor training and mentorship programme to ASSist people with physical impairments in energy povERTy

Project acronym: LIFE23-CET-ASSERT

GrantingAuthority: European Climate, Infrastructure and Environment Executive

Agency (CINEA)

Duration: October 2024 - September 2027

Project consortium

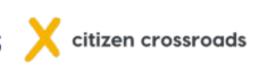

The ASSERT consortium consists of collaborating partners from Italy, France, Spain, Greece, Cyprus, Germany, Belgium, and the Netherlands. The partners are experts in the fields of renewable energy research, policy development, and community involvement, collectively striving to enhance sustainable energy initiatives.

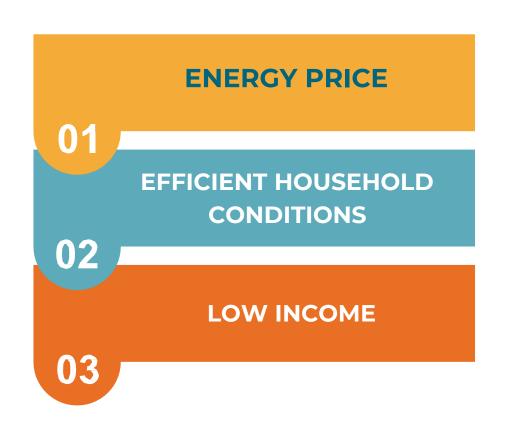

3 MAIN CAUSES OF ENERGY POVERTY

OTHER FACTORS INFLUENCING THE LEVEL
OF ENERGY POVERTY

HEALTH CONDITION (AND RELATED EXPENSES)

SOCIAL FACTORS (SUCH AS SKILLS, EDUCATION, CULTURE)

GEOGRAPHIC AND CLIMATE FACTORS

DEMOGRAPHIC FACTORS (SUCH AS AGE AND GENDER)

Some social groups are more prone or at risk of being / falling into energy poverty.

OTHER FACTORS INFLUENCING THE LEVEL **OF ENERGY POVERTY**

ECONOMIC SITUATION

HEALTH CONDITION (AND RELATED EXPENSES)

SOCIAL FACTORS (SUCH AS SKILLS, EDUCATION, CULTURE)

GEOGRAPHIC AND CLIMATE FACTORS

DEMOGRAPHIC FACTORS (SUCH AS AGE AND GENDER)

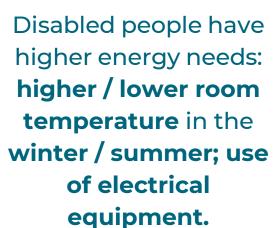

Health condition (and related expenses)

People with health disabilities and / or with critical dependence on electric equipment on electrical equipment for health reasons.

Disabled people have energy needs for a **longer time**: they travel less and spend more time at home.

24% of persons with disabilities are at risk experiencing energy poverty.

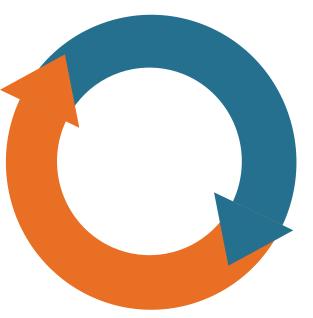

ASSERT – nexus between energy poverty and physicaldisability

Energy poverty condition exacerbates their health conditions

Physical disability exacerbates their energy situation being in energy poverty

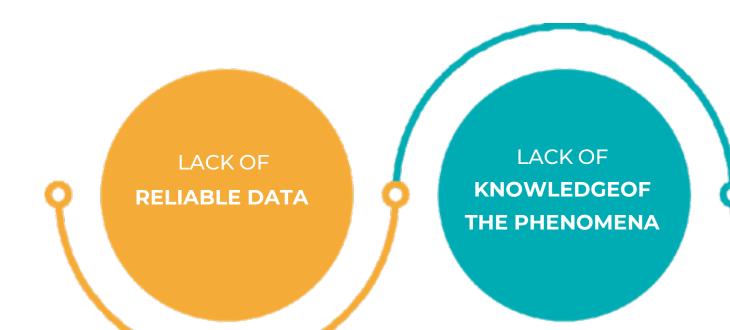

Addressing the needs of disabled people can interrupt the vicious circle of aggravating health conditions as a consequence of unhealthy household conditions to energy poverty and vice versa. ASSERT will address the need of developing tailored activities and measures that target households that are concurrently disabled and energy poor.

ASSER

What are the problems?

LACK OF **CAPACITY TO DEFINE PROPER POLICIES** (by policy actors)

LACK OF **CAPACITY TO PROVIDE SUPPORT TO DISABLED PEOPLE**

LACK OF AWARENESS / **KNOWLEDGE ON DOMESTIC ENERGY CONSUMPTION** (by disabled people)

Via di Villa Severini, 54 00191 Roma

ASSERT mission – target - objectives

MISSION

ASSERT is dedicated to equipping **policymakers, intermediaries**, and **affected persons** with essential knowledge and skills to effectively address and mitigate energy poverty through targeted educational initiatives on energy efficiency and renewable energy solutions.

MULTI-TARGET

SPECIFIC OBJECTIVES

and the nexus with physical disability to take these aspects into account when designing social / energy / health / housing policies

Training course on energy poverty
and the nexus with physical
disability to enable them to provide
advice and assistance to disabled
eople facing energy poverty

Informal training and informative material on household energy consumption, small energy efficient measures and installation of small PV panels for domestic use

Website:

ASSERT activities

Scientific Research

Practical socio- policy context research

Call for the Mentorship programme

- Analysis of domestic energy needs of disabled
- **people** Analysis of energy poverty indicators
- Analysis of domestic comfort level for this target
- Analysis of existing policies and financial support to alleviate the 2 dimensions

- Analysis of existing training on energy poverty / physical disability / nexus between the 2 dimensions
- Analysis of knowledge on the topics and integration in local policies
- Launch of an open call addressing municipality associations to support them in their relative work addressing energy poverty and the nexus with physical disability

ASSERT activities

Mentorship and results

Roll out of target specific training

Policy recommendation s

Work closely (mentor)
 pairs of
 «MUNICIPALITY –
 INTERMEDIARY» per country

- Launch a wide multi-actor and multi-language training programme
- Support all 3 target groups to better address energy poverty and the nexus with physical disability

 Deliver policy recommendations to municipalities

Outcomes of the mentorship programme

- pairs of municipality-association undertaking the programme
- 25 trained intermediaries per pilot
- trained municipal staff in each country
- energy poor consumers with disabilities assisted per pilot
