# Energy poverty Projects in the Netherlands revisited

René Schellekens RVO

13-10-20221

# Major surge in energy poverty

1. Short term solutions €
  - Small energy saving measures and activities
  - Financial support
2. Long term solutions
  - Insulation of houses

## Measures and activities

- › Community of Practice
- › Shared best practices
- › Financial support households
- › Achievement agreement social housing corporations

### Website

- › <https://www.volkshuisvestingnederland.nl/onderwerpen/aanpak-energiearmoede>

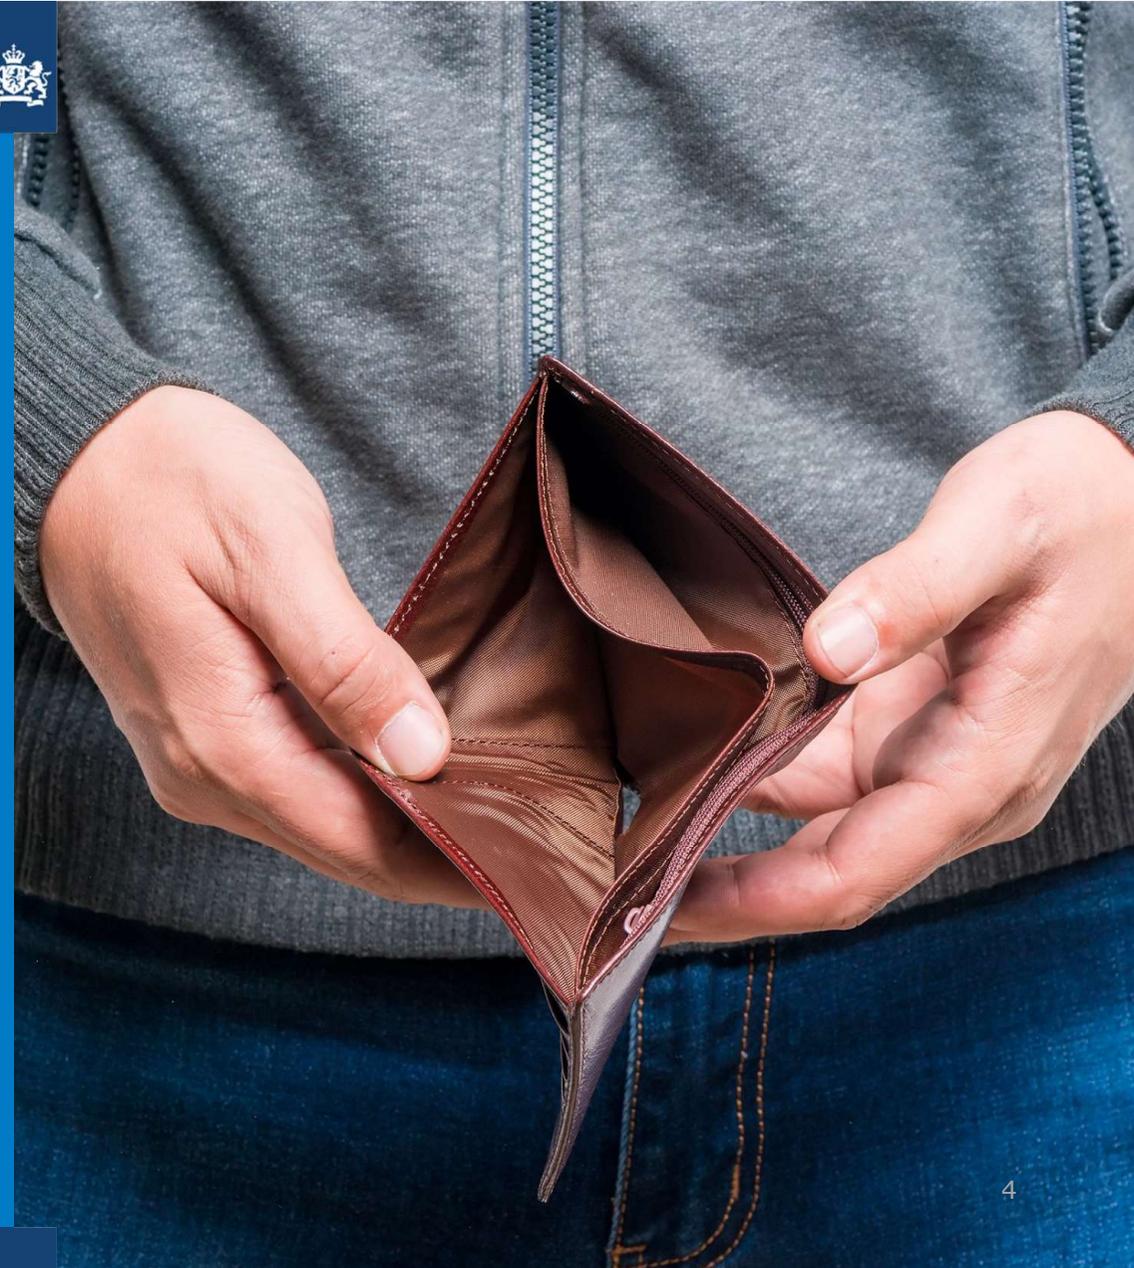

13-10-2022

# Challenges

- › Finding the energy poor
- › Sustained behavioural change
- › Communication with the energy poor
  - i.e. explaining the energy bill

## Project Drenthe Insulation gift

1. Subsidy € 2.000.000 which helps 800 households
2. Opened last week October 3rd
3. Invoice goes to households, but is paid directly through the scheme to the insulation company

# Challenges

- › Finding the energy poor
- › Getting the energy poor to join. It's too good to be true
- › Workforce(solution)
- › Administrative proces for households
