

IT Security / Cybersecurity

>>Energy Efficiency Authority<<

The 8 trends to watch out for in 2023

- (1) The rise of artificial intelligence
- (2) Geopolitical crises and global fragmentation
- (3) Digital supply chain attacks
- (4) Evergreen phishing
- (5) Burnout in security and beyond
- (6) Ransomware-as-a-Service
- (7) Multi-channel social engineering
- (8) (Multi-factor) authentication fails

4 Key Cybersecurity Initiatives

- > DESIGN AND DEPLOY CYBER RESILIENCE
- > DEVELOP CYBERSECURITY SKILLS
- > PROTECT DATA INTEGRITY
- > INTEGRATE CYBER RISKS AWARENESS

Securing businesses with a local approach with global standards...

The 4 essential steps of the Risk Management Process are:

- (1) *Identify the risk.*
- (2) *Assess the risk.*
- (3) *Treat the risk.*
- (4) *Monitor and Report on the risk.*

Information Security Management System (ISMS) – 3 key elements

- Confidentiality
- Integrity
- Availability

When we discuss data and information, we must consider the CIA triad
