

## **CA EED - Core Theme 6**

## **MS Best practices - Slovakia**

Milan, 16 October, 2014

### Jan Magyar Slovak Innovation and Energy Agency

### **Training**

### **Definition of energy services**

**Supporting energy services** 

Energy advisors, providers of services linked to energy delivery ...

#### **Guaranteed energy services**

Energy auditors, Energy Performance Contracting providers ...

Providers of energy performance contracting – no practical experience in wider term

Other professions

Energy equipment installers/RES technology installers etc.

## **Training**

**Training** (voluntary – itself, private accredited legal person or SIEA)

**Re-training** (mandatory by SIEA)

**Energy auditor (simplified scheme)** 

differs for individual professions (e.g. installers)

Documents on education, praxis, additional legal documents

**Examination** (mandatory) theoretical test + practical part

Document on passing the examination

By SIEA, Ministry of Economy or accredited legal persons

**Application for registration** 

Register of professional competent experts (natural person)

Published by SIEA, Ministry of Economy or accredited legal persons (e.g. installers, technicians) Trade registration - Service provider

**Service** 

Natural person – entrepreneur Legal person with professional competent expert as the employee

CT 6 : Availability of qualification, accreditation and certification schemes (EED Article 16)

### **Purpose:**

- Free market for services incl. energy services and their providers
  - Some of energy services coupled with professional competence
- Cooperation possible (e.g. CZ no significant language barrier, similar educational system, similar legislation and regulatory framework), in the EU perspective harmonisation is suitable in longer term
- SK: Still under discussion complex issue, no final decision made yet (according the legislation it is possible, but the recognition process is not exactly defined yet)
- What is quality energy service? In what case?
- Service provided on commercial base/agreement or results needed for legal requirements or financial instruments (e.g. energy audit)?

### **Questions to energy service provider:**

Able to provide quality service? Has he needed professional competence, education, praxis and skills? Is he familiar with legal requirements, legislation, regulatory framework, safety instructions, required results?

### State authorities – procedures of recognition:

- No registration / registration in special register / examination (partial or full)?
- What is the basis of licence of service provider in his domestic country (differences among countries and also training schemes (state guaranteed / private organised)?

### State authorities – procedures of recognition:

Information for service provider in target country – what institution to contact to be recognized?

Information needed for state institutions if they want to meet the recognition applicant needs

(which institution to contact in <u>his home country</u>, verified information on his education and accredited scheme and examinations ... information on quality of work of applicant in his home country ... what to do with complaints ...)

#### **Standardisation**

 Relation between mandatory energy audits and processes under the EN ISO 50001 / EN ISO 14001

One of supporting tools could be a standardisation work e.g. for energy audits it could be used prEN 16247-5 Energy audits - Part 5:

Competence of energy auditors

(what skills and competencies needed to provide quality energy audit)

In-depht analysis at the EU level?

## **Attracting the professionals**

#### **Purpose:**

- to provide the quality service
- be aware on their duties / needed knowledge and skills
- Mandatory for specified activities
- Organising the voluntary training and periodic re-training courses (e.g. by SIEA)
- Giving the information to customers public accessible registers
- Potential coupling with state support financial mechanisms
- (e.g. licensed activity needed for public buildings, EU Structural Funds projects)
- Partially refinanced from state support funds
- (e.g. voluntary energy audits for SMEs from EE Fund)

### Information to customers

#### **Purpose:**

- to know what they get/what to ask,
- to know what is the content and the results,
- to know who can provide the service what they need
- Information campaign under the programme "Live with Energy" by SIEA
- Registers are publicly available (Ministry of Economy, links to SIEA website)
- SIEA website energy advice and information to various groups of customers
- Organisation of workshops and seminars with targeted audience
- Papers in professional and popular magazines and newspapers, TV shots
- Targeted publications and leaflets

## Thank you for your attention
