## Changing reporting landscape and linkages to EED target setting – 1<sup>st</sup> NECP

### Background and motivation

EED Art. 24 paragraphs related to NEEAPs and annual reports will be deleted in the coming EED revision. In future EED planning and reporting requirements will be part of National Energy and Climate Plans (NECPs) and reporting requirements in the Governance. In addition EED target setting in Art. 3 and Art. 7 have a clear linkage to the Governance NECP's EE target setting and follow up.

Even it is not clear if the Governance will be adopted in March 2018, and probably neither EED revision, at least at this point topic is topical for MS in spring 2018<sup>1st</sup> while the 1<sup>st</sup> draft for NECPs is asked by the end of 2018.

### Objective

To get information and discuss the requirements for the 1<sup>st</sup> NECPs and the concrete changes in connection to EE planning and reporting requirements in EED (Art. 24) which are planned to be replaced by the Governance initiative. In addition to inform / discuss other linkages in NECPs related to EED (e.g. Art. 3 and Art. 7) and how MS proceed with their 1<sup>st</sup> NECPs if target setting and other requirements under EED revision are not finally adopted before the 1<sup>st</sup> NECP should be provided.

### Product

One informative session in Vienna. Highlights from the session to be included in the proceedings after the PM.

### Working method

DG ENER presentation (tbc) on the current status of the Governance related to the topic and Q/A. In addition, discussion regarding the situation in MS related to the preparation of the NECPs.

### Experts

–

### Target audience for attendance at the plenary meeting and WG report

National organisations that are responsible for EED implementation and involved in EED target setting, EE planning and reporting and/or processing the NECPs.
